

## **Kielder Castle Red Squirrel Centre – open 2010**

Save our Squirrels invites you to discover the world of the red squirrel at Kielder Castle Visitor Centre. We have just created a room full of fun, interesting and interactive displays to help you find out why Kielder Water & Forest Park's red squirrel reserve is so vital to the future of red squirrels.

Could you be a forest ranger and manage the forest for red squirrels? Find out with our bespoke interactive computer, created for Save our Squirrels by computer game students at Northumbria University.

See red squirrels feeding in a remote part of the forest on the live squirrel-cam system.

Get in touch with parts of the squirrel's life in our 'feely' box.

Find out why grey squirrels are such a threat to reds and what is being done to ensure that red squirrels have a long term future in the north of England.

Discover what you can do to help save our red squirrel.

The Red Squirrel's World will be open to the public from Easter weekend when Kielder Castle Visitor Centre opens for the season.

For more information call 01434 250 209.
